## Reduce CO2e emissions

Reduce your carbon footprint with CSRD compliant devices from Teqcycle.

### CO2e emissions

## How is Teqcycle created?

### 1. Sourcing

The devices are sourced from companies where they typically have their first life cycle.

### 2. Selection

We select only the best devices for our Teqcycle program. All devices are tested and handled in accordance with various ISO certification standards.

### 3. Refurbishment

The devices are disassembled, cleaned, and components are replaced if necessary. The devices are either repainted or skinned to appear as good as new.

### 4. Reassembly

The devices are reassembled and installed with Windows 11 Pro.

### 5. Quality check

The devices undergo strict quality control to ensure that all units meet our high standards.

### 6. Teqcycle

The refurbished premium device is packaged in a Teqcycle box – ready for sale.
